2.1 Educational aims and objectives

ACT's BA Hons in English features two pathways, one in Language and Literature, and a second in Communication and New Media. The program of studies has been designed to be fresh, modern, and relevant to the academic and professional realities of today. It offers a synthesis of traditional and contemporary course content. Students take courses in literature, social media and communication, teaching methodologies and practices, creative writing, film studies and digital content. Emphasis is placed on a creative and analytical approach to learning. The classic becomes contemporary; texts meet technology. The English majors are encouraged to be critical and creative while exploring the written and visual culture of the world around them, both past and present. They learn how language has developed, how the words and texts we read today are influenced by social factors such as technology, marketing, and cultural norms, and why literary and media canons need to be challenged and change.

The aims and of the objectives of the BA Hons English are to:

- provide students with vital knowledge in the subject areas of literature, media and communication, language and culture, with particular emphasis on interdisciplinary connections and perspectives;
- develop students' conceptual, analytical, critical, and creative skills for academic and professional purposes;
- help students become more astute readers, critical thinkers, and effective communicators;
- enhance students' adaptability to change and their ability for life-long learning and self-development;
- challenge students to operate efficiently and innovatively in dynamic multicultural academic and working environments;
- cultivate confidence, open-mindedness, collaborative ethos and a commitment to collective and individual progress;
- prepare students for postgraduate studies and professional settings

Throughout, learning strategies acknowledge, respect and encourage a wide variety of learning styles and activities, offering a balance between the provision of information (direct or resource-based) and opportunities for active assimilation, application, questioning, debate and critical reflection.

The learning outcomes below distinguish as needed the two pathways.

2.2 Relationship to other programmes and awards

The programme has a number of cross-listed modules with the other ACT programmes. These are clearly sign-posted in the Curriculum map and submitted with the revalidation documents. Most are optional modules or modules to be selected among a set (for example, one module among Marketing 200, Marketing 214, Soc Sc 215 for Level 5 in this pathway).

In addition, within their first two years of study, all ACT students are required to take a common general education curriculum consisting of 14 non-OU validated modules; the General Education Requirements, or GERs, are coordinated across the divisions and disciplines by the Academic Council with key input from faculty at the Division level. The GERs are placed into three main categories, the Arts and Humanities, the Sciences, and the Social Sciences (including modules such as Composition I and II, Advanced College English Skills). As a mechanism to implement and support student learning outcomes at the institution and programme levels, the GER courses are aligned with all academic programmes to provide a number of transferrable skills with a professionally-oriented dimension. In addition to developing communication, information and digital literacy skills, the GER curriculum emphasizes critical thinking and problem solving, quantitative reasoning, civic engagement, conflict resolution, creative expression and ethical integrity. With its solid liberal arts underpinning, the GER curriculum enriches students' educational experiences as they are also exposed to a range of viewpoints and debates that are part of current public discourse. As students progress from year to year, the GERs also provide the necessary links and transitions to the overall programme in terms of breadth and depth of knowledge directly relevant to the English programme (for example, the students move from an 'Digital Skills for the Humanities' GER, to a sequence of media modules across all level).

4. Distinctive features of the programme structure

- **Where applicable, this section provides details on distinctive features such as:**
 - where in the structure above a professional/placement year fits in and how it may affect progression
 - any restrictions regarding the availability of elective modules
 - where in the programme structure students must make a choice of pathway/route
- **Additional considerations for apprenticeships:**
 - how the delivery of the academic award fits in with the wider apprenticeship
 - the integration of the 'on the job' and 'off the job' training
 - how the academic award fits within the assessment of the apprenticeship

Required modules unique in one pathway can be taken as elective modules to satisfy this elective requirement in the pathway. In addition, the programme coordinator, in consultation with the teaching team, selects from an available list (attached with this submission) of elective modules as need and student interest arises. The electives are listed per level and serve to strengthen a particular field within the subject (for example, additional modules in teaching and education can be offered if a particular group of students declares such an interest and is so career-oriented). As a result, some electives will be offered more regularly than others.

Given the above scheme, students can decide on their pathway half way through level 4.

All students majoring in English can choose to do an Internship in Level 6, either on campus (Anatolia English Programs, Learning Hub, Library, etc.) or locally (mainly various NGOs), depending on their pathway and career interests.

5. Support for students and their learning.

(For apprenticeships this should include details of how student learning is supported in the work place)

Academic Support Services include:

- Financial Aid
- An academic advising program through which each student is assigned an advisor upon entering his/her freshman year who will offer advice on the students' academic and career plans. Students are expected to meet with their advisors regularly throughout the semester, and especially when they

face academic problems or want to withdraw from a course. Students are expected to consult with their advisors prior to registration. In the case of English, the English Coordinator assumes full responsibility over the English majors and their programme of study.

- Counseling services for students experiencing emotional and other challenges.
- An optional but highly recommended English Language Preparatory Program prior to the first term at ACT for those students who need support in building their English language proficiency.
- A Learning Hub (prior Writing Center), open to all students, to help with writing, math and science projects since many are not familiar with project-oriented education and are used to lecture-based classes.
- A Business Liaison and Career Services Office through which students are provided assistance with their efforts in preparing graduate school applications and employment search, as well building bridges with the professional world. The office also develops programs and workshops to help with the students' future career plans. Detailed information on its services is provided in the Background document.
- An I.T. center which provides technical assistance and advice, as well as information technology instructional services.
- In the Niarchos Technology center, students have access to computer labs and printing services.
- Office facilitating and advising on Study Abroad opportunities.
- Extensive Library facilities and assistance. Remote access to all e-resources is available to students.
- A concise, student-friendly guide to the Harvard citation style (to be used across the institution) is available on Bissell Library's website.
- ACT has a learning disability policy in practice and provides appropriate assistance and compensation to students that have certified needs.
- ACT maintains a long-established Committee on Academic Standards and Performance.
- ACT provides Internship opportunities (through the Level 6 Placement 300 module) and Service learning and Community Service programs to all its students on a volunteer basis, in order to enhance the development of their social and professional skills.

Students are informed in detail of all services and facilities during their induction (Orientation Session), through meetings with their advisers as well as through accessing e-documents (Undergraduate Student Handbook) and the ACT website. The English Programme Handbook included with the revalidation documents directs to all such relevant services and links.

6. Criteria for admission

Application Requirements (Greek/EU Admission and Non-EU Admission)

Applicants are required to submit the following when applying for admission to the program:

An Application Form.

An official high school transcript of grades. If you have not attended an English- or Greek-speaking high school, an official translation into English is required.

8. Information about non-OU standard assessment regulations (including PSRB requirements)

New scheme for passing a module

Starting in the Fall 2018 term, ACT has put in effect a new scheme for passing a module. Details follow:

Every assessment in every module has an associated threshold value (mark), which is set to 25 for all assessments. Students would need to achieve this minimum value (mark) in order to ensure that they have made a genuine attempt at each and every assessment.

In order to pass a module, the student has to:

1. Achieve a mark that is above threshold (25) in all assessments.
2. Have an overall weighted average in the module that is 40 or higher. In the case that the student fails to accomplish one of the above, they will need to re-sit the failed component and the re-sit results will be capped at 40 as per the current regulations.

Based on this for a piece of assessment, the student can:

1. 'Pass' the assessment: score 40 or better
2. 'Make a genuine attempt' at the assessment: score between 25 and 39
3. 'Fail' the assessment: score 24 or less

Cases 1 & 3 follow the current rules – pass and re-sit respectively. In case 2, if the student has an overall module average of 40 or better, they are seen to have meet the associated learning outcomes of the module collectively to pass the module and do not have to re-sit the assessment.

The above proposal does not apply to the Thesis modules. In these modules, the student has to resit an assessment when the mark is below 40 as per the current regulations.

9. For apprenticeships in England End Point Assessment (EPA).

(Summary of the approved assessment plan and how the academic award fits within this and the EPA)

10. Methods for evaluating and improving the quality and standards of teaching and learning.

Standard evaluating methods are into place and overseen by the programme coordinator: evaluating through student evaluation forms, grade averages, sit-in observation and meetings, formal or informal, with both students and faculty. All relevant information is passed on to individual instructors and program coordinators so it can be used to improve teaching and learning strategies. Wherever necessary, the program coordinator conducts individual or group faculty mentoring. The recently adopted Module Reports provide opportunities for self-reflection on teaching strategy and assessment methods, thus adding to the methods available for evaluation. Finally, the departmental meetings, division meetings and the academic council function as means to address issues for improving the quality and standards of teaching and learning. An institution-wide policy on Academic Integrity is in place (included in the Student Handbook and all module descriptors) to safeguard quality and standards of learning. A more thorough discussion can be found in the Background document #12
